WORK EXPERIENCE

BBAC BANK

Lebanon
Oct 2025 - Present

Full Stack Software Developer

- Develop and maintain fintech applications supporting core banking operations, including an instant card issuance system.
- Implement backend logic and database integrations using ASP.NET (VB.NET) and Microsoft SQL Server.
- Automate operational workflows and data processing tasks using Informatica.
- Translate functional and business requirements into structured, reliable software solutions.
- Ensure data accuracy, security, and consistency while participating in deployments across multiple environments.

VALOORES

Lebanon
May 2025 - Oct 2025

Software Developer

- Worked on enterprise-grade fintech and large-scale systems in production environments.
- Developed backend services using Spring Boot and Django.
- Wrote complex SQL queries for Oracle and PostgreSQL databases.
- Built and enhanced front-end components using Angular and ZUL (ZK Framework).
- Collaborated with cross-functional teams to deliver scalable and secure software solutions.

EDUCATION

**UNIVERSITY
OF BALAMAND**
